SOFTWARE
Nimbus

PROVIDING SOLUTIONS FOR YOUR BUSINESS.
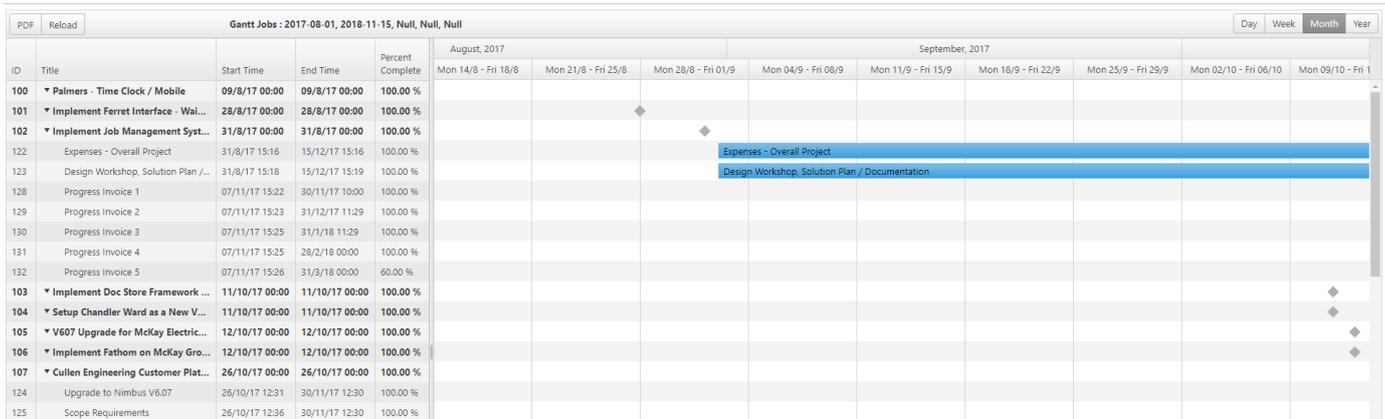

VISUAL PROJECT PLANNER

Overview

The Nimbus Visual Project Planner (VPP) is designed to give you an interactive visual tool to manage your projects / jobs in real time. See where your bottle necks are. Which projects are at risk of not meeting their required completion dates. Can track down to individual task level. Allows you to look at your business as a whole or project by project, an ideal tool for project schedulers, QS's or project managers.

VPP is an enhancement to our latest scheduler and therefore not all clients will require it. As such it is a separate product and only added when requested. Please see Technical Specification for further details.

Productivity features

Big picture view of all projects / jobs
Allows for better planning on resources and makes finding bottlenecks easier so they can be addressed faster for improved profitability.

Edit Nimbus project data from a visual layout
Allows you to review and edit dependencies right down to individual tasks (if entered) to verify that a project is on track.
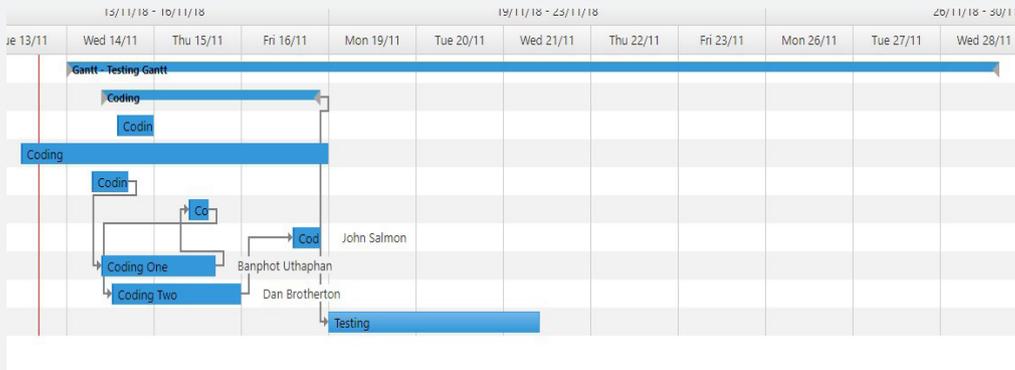

Allows printing to PDF
Provide people out on the job with a printed overview of the job timeline or better still attach as a document to your Nimbus mobile application.

Gantt type viewer

Provides the most important features of a Gantt viewer with in-line editing for such items as: Start/End time; Project/job/task name; duration; task order.

Manage project dependencies visually

Easily review all project dependencies and see if a project is going to be achievable by planned / promised timeline.

Various resource types can be planned for

Typically, this would be by employee but could just as easily be by production line; piece of equipment; team etc.

JIT (Just In Time) projects

Helps you visually work backwards from when a project ultimately needs to be delivered to see when is the latest each step needs to be completed, helping to show bottlenecks and spare capacity that can be filled with other work for increased profitability.

Caters for multiple views

With the use of parameters being passed to the VPP the exact view you need, to be most productive, can be setup and accessed via a single button click.

Caters for both productive and non-productive tasks

Can help ensure you have made allowances for non-project work like employee training; leave; cleaning of workshop etc. tasks that might otherwise derail a project timeline are now visible.

Technology

- **Supports Chrome browser**
  By supporting Google Chrome, Nimbus is future proofing your investment.
- **Fast reporting**
  Advances in browser technology means using Chrome results in a much improved reporting speed.
- **Updated intranet**
  By continually updating the intranet Nimbus is not only protecting your investment, it is ensuring it can take advantage of technology change as they come along.
- **New look and feel**
  A consistent approach to the look and feel of all screens. Clean and simple.
